### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: The Declaration filed on July 11<sup>th</sup>, 2005, is relied upon to show unexpected results in the TAM value of the sodium percarbonate granules produced by the claimed process, using both magnesium and waterglass additives within the claimed ranges. It is shown that the use of both magnesium and waterglass additives together provides a synergistic effect, resulting in a reduction of the TAM value of the sodium percarbonate product and correspondingly a greater storage stability.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
